Local Students Spend Spring Break at the Shipyard

Newport News public high school students participated in the Career Pathways job shadowing "Spring Break - Make it Work" program held on April 5-6. The goal of the program was to pair high school students with local companies offering job shadowing opportunities during the spring break holiday.

At Newport News Shipbuilding, students spent two days shadowing shipbuilders in the design, electrical, mechanical and structural engineering departments. Students were also able to participate in Modeling and Simulation, Rapid Prototyping and Rapid Operational Virtual Reality interactive demonstrations.

For more info on Career Pathways initiatives, please contact **Jennifer McClain** (O44) at 8-8439.
